Fridays' Swyx Tip #9: Transfer from mobile extension to office phone

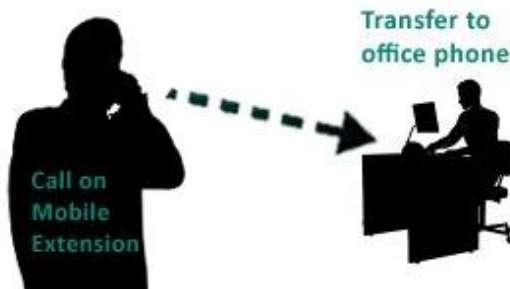

Entry posted by Tom Wellige November 1, 2019
1,153 views

From 2009 to 2011 [mirjam baumberger](#) wrote a great blog, the "**Fridays' Swyx Tip**". Every Friday she posted a tip regarding the usage of SwyxWare and connected tools and devices. As the old forum is **offline**, this article series will be restored here again over the time. Please note that some information in this article series might not be valid anymore with current SwyxWare versions.

This blog article was originally posted on 16.01.2009 00:00

Dear Swyx Users

Many of you are familiar with the SwyxMobile extension. When you are away from the office, incoming calls to your extensions are forward to your mobile extensions and common pbx functionalities such as transfer, conference or even call-recording can be triggered from your mobile phone.

Let's assume you arrive back in the office while talking on your mobile extension. It's now only a click away to transfer that call from your mobile to your desk phone.

Your office phone will start ringing and once you have picked up the phone, you then can continue your conversation on the office extension.

Or, if you are in a phone conversation on your SwyxIt! and you want to transfer that call to your mobile extension, you can also transfer the call to your mobile extension with only one mouse click*.

From Mobile Extension to Office Phone

You can transfer a call from your mobile extension to your office phone by selecting "Transfer to office phone" on the SIM menu

From Office Phone to Mobile Extension

You can transfer a call to your mobile extension by a simple drag and drop the active Line to your "Connect to Mobile Speed Dial"

* Please download the ECR script from the link below. This script will allow you to call your own mobile extension from your desk phone.

Additionally you can edit a Speed Dial and configure the Script Number to it. The modified SwyxIt! Skin including a "connect to mobile speed dial" can be downloaded from the link.

Download script & skin from here:
